Can be Had Declared Commissioner Gunshanan if the Representatives and Senators ask for it of Next General Assembly-Drs. Pollock and Brophy Also Heard on Tuberculosis.

An audience of about 100 was at Y. M. C. A. hall on Sunday afternoon at 3 o'clock for a meeting conducted by the Central Labor union in observance of Labor's Tuberculosis Sunday, which had been appointed for March 6th by the state conference at Meriden some time ago. The Norwich concert orchestra, which contributed its services, rendered a pleasing concert at heready in building good roads and armories. It is for the people to say how much the state shall give to protect the health of the communities within its borders. The speaker told of the suffering and sorrow which this dread disease brings into the homes of the poor, and of numerous cases where the presedying of the people to say how much the state shall give to protect the health of the communities within its borders.

briefly how the day had been decided upon by the state conference, and also expressed his regret at the small number present to hear the addresses upon this important subject. He presented Mayor Lippitt as chairman of the meeting.

meeting.

Mayor Lippitt as chairman of the meeting.

Mayor Lippitt commended the interest shown in the subject by those who were present, while he regretted that there were not more, for he considered that this was a subject upon which there could rightly be no indifference by the general public, for it was a matter affecting all and the state had considered it so important that a state tuberculosis commission had been appointed. Mayor Lippitt introduced pointed. Mayor Lipplit introduced Dr. E. J. Brophy as the first speaker.

Early Signs and Prevention. Dr. Brophy specialized in his inter-esting address upon two points, the ecognition of the early signs and the recognition of the early signs and the preventive measures. Consumption is curable and being cured right here in Connecticut, but with a recognition of the early symptoms this germ disease can be cured. Among these were loss of weight, loss of appetite and loss of ambition, the raising of blood when coughing, continued hoarseness and pain in the throat, and any case of pleurisy should be investigated. If these early symptoms could be known, many cases of tuberculosis would never seven of the best known diseases company to the company to the state hospital followed Mr. Gunsnan-an, introducing his talk by mentioning the great advancement in all fields of knowledge in the last twenty-five culosis is not contaglous, but is communicated by the tubercle bacillus which comes from people or animals already infected. More people die from tuberculosis alone than from six or seven of the best known diseases. many cases of tuberculosis would never

come futal. The preventive measures he men-loned were destruction of the sputum by fire, the use of individual drinking utensils by the affected person. Proper preventive treatment includes rest, fresh air, and good food, with scarcely any medicine. Rest for the consumptive is most important, he should not be chased out into the fresh air and set to chopping trees with the idea of getting strength. The doctor said there getting strength. The doctor said there was great need in this neighborhood of getting an institution where those unable to provide for themselves the proper fresh air and food facilities. Dr. Brophy's instructive trig was greeted with applause.

Hon, John F. Gunshanan, one of the three members of the state's tuberculosis commission, followed Dr. Brophy with an address that enlisted the

can have a state tuberculosis sanitarum if the senators and representatives from the county are interested enough to ask for the same in the next gen-

New Haven countles, where the cost | per patient has been reduced to a minhundred patients and are expected t be in operation by the 1st of July. Mr. Gunshannon said that the day camp the treatment of consumptives for the freatment of consumptives was all right as far as it goes but to conduct it properly would make it a very expensive undertaking. Authori-ties on this subject tell us that a per-son in the advanced stage of tuber-culosis will expectoratt not less than 10,000,000 germs every 24 hours and that these germs live for three years in dark hallways, factories, and rooms where the sunlight does not penetrate; that the germs are blown around in the dust and thus people in a weak-ened condition become affected with

is also claimed that every death from tuberculosis leaves two new vic-tims. The speaker told his hearers that if a mad dog is known to be at but they allow careless consumptives | to expectorate everywhere and pay no attention to them. If the mind of a factory employe should become affected he would soon lose his position because the workers would fear that he might do them bodily injury. And yet we seldom hear of a person being yet we seldom hear of a person being injured by a man thus afflicted. On the other hand, the workers in the factories allow the consumptive in their midst to expectorate millions of their midst to expectorate millions of John of New London, Hugh of Lowell, these deadly germs around them and are heedless of the danger. Our state

PLAINTIFF AWARDED \$100.

Suit to Recover Wages in Case Where Contract Was Broken, Attorneys Edmund W. Perkins and

Altorneys Edmind W. Ferkins and Change the food is the first duty of Allyn L. Brown of the firm of Brown & Perkins appeared for the plaintiff in the case of J. Warren Stark vs. the town of East Lyme, tried before Justice of the Peace J. Ely Beebe in the town of Lyme Saturday. Attorney Geary of New London appeared for the town.

The suit was for \$100, claimed as says:

The suit was for \$100, claimed damages by the plaintiff for the breach of contract whereby the school board of the town hired his minor daughter to feach for the school year of 36 light most of the time. About four years to feach for the school year of 36 light most of the time. About four years ago I left off coffee and began taking Regular business was transacted.

some time ago. The Norwich concert orchestra, which contributed its services, rendered a pleasing concert at the opening of the meeting. The use of the hall was contributed by the association.

Mayor Lippitt Presided.

At the opening of the meeting John J. Connelly, chairman of the Central Labor union's committee, explained briefly how the day had been decided upon by the state conference, and also expressed his regreat at the small number present to hear the addresses upon this important subject. He presented Mayor Lippitt as chairman of the The speaker also told of the condi-

The speaker also told of the condi-tion in many of the factories where investigations have been made and which shoved the problem to be a very complex one so far as sanitary condi-tions are concerned. In closing, Mr. Gunshannon said that the representa-tives from New London county hav-never stood in the way of appropria tions being made for public improve ments in the three largest countles of the state and he was therefore sat-isfied that they would be only too glad to favor their county with a sanitarius such as the ones now being erected Mr Gonshanan was enthusiastically applauded.

Dr. Pollock Speaks.

seven of the best known diseases co bined. Nearly one-seventh of the deaths all over the civilized world are from tuberculosis and the great pity is that it is preventible. An ounce of prevention is worth many, many pounds of cure. The education and instruction of the public should be promoted. The breath of a consumptive is unattended with danger, for the germs are carried only in the sputn but when this dries it is dangero The affected one should be compell to expectorate into a vessel containing a little water and not into handker-chiefs and cioths. The bacillus clings to moist surfaces and cannot be re-moved by currents of air until they have dried. Dr. Pollock said that for the cure of tuberculosis it was known to be but of little consequence where a man lives, but how he lives is the whole story. Perhaps we can safely say there are about 10,000 people in Connecticut who should be received in institutions.

phy with an address that enlisted the sympathetic attention of his hearers. He said that he was delighted to come here, as this was the first opportunity to come east of the Connecticut river to speak about the state's inherculosis work. He was not worried about a small audience, for he had found in his experience, he said, that the workers were perfectly willing to have their chairmen and officers do all the work, while they waited to heart the reports and criticise. Continuing, Mr. Gunshanan declared:

Sanitarium in This County.

"The people of New London county"

Whole story. Perhaps we can safely say there are about 10,000 people in Connecticut who should be received in institutions.

Speaking of what might be done in Norwich Dr. Pollock asked what should be done with the advanced and carry cases. He asked why the Central Labor union could not affect an organization for the conduct of a tuberculosis camp, the reporting of cases, the instruction of families, the proper construction of families, the proper construction of families, the proper regulations in factories about spitting. He said that the good general rospital said that the good general rospital and the free dispensary in this city were a great advantage and plac Norwich in a particularly favoral position in securing medical help this cause.

Mr. Gunshanan told of the great workingmen's movement in the large cities of the state, through whose efforts with a spitaging state of the state of the spitaging shape. forts principally the sanitariums have been erected in Hartford, Fairfield and had in mind. This concluded the meeting, and the orchestra played a se-lection while the audience was leav-ing. The Central Labor union's committee which arranged the meeting comprised John J. Connelly, chairman William Potter, Walter H. Spaulding and Milton Grant.

NORWICH TOWN
